TYPOGRAPHY

TYPOGRAPHY

TYPEFACE OVERVIEW

Neue Haas Grotesk is used across all typography levels to give the brand a cohesive, modern look. Headings use bolder weights to create a strong and confident presence. Subheadings introduce hierarchy through smaller font size. Body copy uses thinner weight for hierarchy, clarity and readability.
Reenie Beanie is used as the accent handwritten typeface within the Jelani visual identity. The handdrawn font complements the structure of Neue Haas Grotesk. This font is used sparingly to highlight moments of personality.

SYMBOLS

INVESTMENT

SYMBOLS

Jelani's brand symbols are secondary graphic elements used to support and elevate the overall identity. They can appear on printed collateral, labels, digital layouts, and small branded moments where a subtle visual accent is needed. Symbols should be used sparingly, in approved colours, and never as a replacement for the primary logo.
